

Dr. C. T. Kao is currently a Software Engineering Director in the Multi-domain System Analysis (MSA) group of Cadence Design Systems. He has been performing analysis, simulation, and design of novel products in the fields of electronic packaging, semiconductor processing equipment, and Micro-Electro-Mechanical Systems (MEMS) for two decades. While working at a MEMS start-up company and as a technical consultant, he and the teams successfully developed various MEMS products including micro-mirror device for portable display application and multiple MEMS sensors, from prototype to volume production with satisfactory reliability and yield. C. T. previously also worked for National Semiconductor Corporation (acquired by Texas Instruments) in the Packaging Technology Group and for Applied Materials in designing semiconductor components and equipment for physical vapor deposition (PVD) and atomic layer deposition (ALD) processes. He has served as an Assistant Professor in the Department of Mechanical Engineering of National Chung Cheng University in Taiwan for a year. C. T. received his B.S. from National Taiwan University and M.S. from the University of Texas at Austin, both in Mechanical Engineering, and his Ph.D. from Stanford University in Aeronautics and Astronautics.
