

Call for Papers: Special Issue of the IEEE T-MTT on the 2023 IEEE MTT-S International Conference on Numerical Electromagnetics, Multiphysics Modeling and Optimization (NEMO 2023)

Authors of all papers presented at NEMO 2023 are invited to submit an expanded version of their papers to this special section. The expanded version requires that the new technical content will include a more in-depth treatment, new results beyond the NEMO 2023 paper, or both. The T-MTT Editorial Board will review every paper in the same manner as any other regular submission.

When you prepare your manuscript you should consult the instructions, templates and resources available at the IEEE Authors' Center (<https://ieeauthorcenter.ieee.org>). Papers not following the standard IEEE journal template cannot be accepted into the peer review process. Please be aware that your contribution should be **prepared as any other regular T-MTT paper** and that it will be evaluated via the same peer-review process. The quality of your contribution **must meet the level required for a publication at T-MTT.**

Other Submission instructions:

- (1) The conference(s) paper(s) must be included along with the submission as supplementary files.
- (2) You must reference your own work, especially recent journal/conference publications. Discuss your related publications, **especially the relevant conference paper**, in the introduction. Distinguish the new results you present in your current manuscript from those found in your previous publications, **to demonstrate that the paper includes sufficient new technical material to justify a new paper, when compared to all previously published papers.**
- (3) The following note should be added to the footnote on the first page of the paper: *“This paper is an expanded version of a conference paper presented at IEEE MTT-S NEMO 2023, Winnipeg, MB, Canada.”*

Submissions are accepted any time, but no later than **September 10, 2023, 11:59 PM (Hawaii Standard Time)**. *There will be no extension to this deadline.*

If you have any questions, you can contact the Guest Editors:
